Manufacturing Needs

Stewart Steel is an established steel fabrication company, located in Weyburn Saskatchewan. We specialize in industrial, oilfield and agricultural manufacturing.

Our CWB fabrication shop is certified to work on mild steel, aluminum and stainless steel. In addition, we have a complete blast and paint facility on location as well. We are located right in the heart of the bakken oilfield providing over 20 years of design and innovation to the petroleum and industrial industries. We are committed to providing our customers with products and services of exceptional quality and value and are constantly striving to exceed expectations and ensure customer success.

Whether your project is large, medium or small, we always appreciate the opportunity of being able to go to your site and create both a plan and a quote that will fulfill your needs. We would be happy to arrange a shop tour as well if and when it is convenient.

Industrial and Oilfield Project Manager – Jaden Stewart

Agriculture Project Manager – Tanner Stewart

Design – Mike Penner
